

Leaflet for the care of your Bearded Irises

	Height:	Blossom:	Habitat	Soil
M iniature D warf B earded (MDB)	up to 20cm (8")	April	<p>Bearded irises like to have blazing sun the whole day. The best place is in a bed that is exposed to the sun from dawn till dusk.</p> <p>Rivalry with other plants should be avoided.</p> <p>Don't let the rhizomes be overrun by weeds or covered by too much soil.</p>	<p>Bearded Irises need a well-drained soil that provides enough nutrients for a strong growth and big flowers.</p> <p>But be carefully about fertilizer, for too much nitrates can cause negative effects. One or two times a year a little bit of compost is enough.</p>
S tandard D warf B earded (SDB)	21cm - 40cm (8"-16")	April - May		
I ntermediate B earded (IB)	41cm - 70cm (16"-27,5")	May - June
